

CSI

Montevideo

CSI is the leading multi-specialist consulting and engineering firm in Uruguay that provides world-class services in the industrial and infrastructure sectors.

CSI is the main multi-specialist engineering and architecture consultancy in the country and a benchmark in the region. With more than 40 years of experience, it provides world-class services for the industry, infrastructure and buildings sectors, covering more than 3,000 projects in 30 countries around the world.

Its team of more than 300 professionals delivers value in complex projects by providing planning, engineering and design, project management and asset management services. Combining several disciplines; civil, structural, MEP, environmental, transportation and traffic engineering, implementing BIM methodologies.

CSI main clients are public organizations, multilateral banks, construction companies, industries and global engineering companies.
