SOFTWARE FOR CAPITAL MARKETS · BROKERWARE ·

BROKERWARE

>> MANAGEMENT, ORDER ROUTING

In Brokerware we build b2b management system software for broker dealers, investment banks and private banking sector of banks.
Our software is front to back and that means we cover everything from a retail client entering an order in one of our trading platforms to book keeping, all the process in the middle and all related processes to that. That's the management system and client interphases.

FEATURED PROJECT
BrokerwareX is a management system for broker dealers built as a single huge API and on top of that, 9 different platforms, each one of them specially designed for each role in the company.
