BDA Foderé

, Montevideo

BDA Foderé is a Uruguay real estate brokerage focused on rural land (forestry, agriculture, livestock) for private investors from Europe, Brazil, Argentina, the US and Paraguay. Also broker for urban land developments and port/logistics projects.

Real estate broker specializing in rural real estate in Uruguay: forestry, agriculture, and large-scale livestock farming. I work primarily with private investors from Germany, Spain, Italy, France, the United Kingdom, Brazil, Argentina, the United States, and Paraguay, advising on asset identification, due diligence, negotiation, and closing.
I also act as a broker and introducer for large-scale urban subdivisions, connecting landowners, developers, and investors; and for agricultural logistics infrastructure projects, including the in-house development of Terminal Taquarí, a river port terminal that will connect Uruguay and Brazil via Laguna Merín and Lagoa dos Patos. I seek to connect with international private investors interested in rural real estate, urban development, and logistics infrastructure in Uruguay.
