Success Stories

Stanford University "My first trip to Uruguay was eye-opening. I had no idea that this small country had so much to offer. From the impressive universities, the entrepreneurial spirit, and magnificent coastline, it is clear that Uruguay is poised to step onto the world stage."

**Tina Seelig, Executive Director,
STANFORD Technology Ventures Program**

ORACLE NETSUITE "Netsuite started business in Uruguay on May 2012 by acquiring two Uruguayan companies. Uruguay was a key component to start a whole new strategy of an eCommerce product called SuiteCommerce. We are creating the product and providing the implementation service from Uruguay to customers in the whole world."

Diego Terra, Senior Director of Ecommerce, NETSUITE

Verifone "Verifone operates in Uruguay since 2006 when Trintech operations were acquired. Since that time up to now the diversity of skills and talented staff found on the country has allowed to consolidate Uruguay as one of the Centers of Excellence from where we provide support and services for our customers around the world."

Rafael Cuenca, VP Engineering, VERIFONE
