☎ (598) 2915 3838

📍 Rincón 518-528 | Montevideo, Uruguay

Sebastián Gómez has held the position of Technology Coordinator at Uruguay XXI since 2013. In his role, he leads the planning and management of the agency's technology initiatives, supporting the various departments in their digital transformation, digitization, and continuous improvement processes.

He is a Programmer Analyst with experience in technology management, projects, and digital solutions, focusing on the implementation of tools designed to optimize processes, improve efficiency, and strengthen data-driven decision-making.

At Uruguay XXI, he coordinates cross-functional technology initiatives and collaborates with various departments to identify opportunities for automation, process improvement, and the implementation of new solutions. His main areas of work include the evolution of management and CRM systems, business intelligence and data analytics, the implementation of artificial intelligence solutions, technology infrastructure, and cybersecurity.

His role combines a strategic vision of technology with project management and the coordination of teams and vendors, acting as a bridge between the needs of the business units and technological solutions.
