Chain** 2024

RELEVANT INFORMATION

Uruguay Best Practices in Pharma Supply Chain celebrates its 5th edition in Montevideo, Uruguay.

This is the largest regional event in the industry, bringing together international leaders and prominent figures in the sector. In the previous four editions, this conference has brought together, both virtually and in person, key stakeholders from the supply chain of major international pharmaceutical companies and logistics solution providers, generating an ideal space for the exchange of information, business generation, and dissemination of best practices and success stories.

The event emerges as a collaborative initiative between leading international pharmaceutical companies with logistics operations and supply chains in Uruguay, and

the public sector represented by Uruguay XXI; the agency for investment promotion, export, and national brand, and INALOG, the National Institute of Logistics.

The previous edition in 2023 attracted over 200 industry experts and more than 15 national and international speakers, confirming the event as a key catalyst in the regional pharmaceutical industry.

Employees attending the event can gain access to the latest trends, best practices, and innovations in pharmaceutical supply chain management and logistics. This knowledge can be directly applied to their roles within the company.
